(54) Title: PRODUCT CHANGE METHOD FOR A CIGARETTE MANUFACTURING MACHINE

(57) Abstract: A product change method for a cigarette manufacturing machine (1), wherein an input hopper (2) receives a first type (3a) of shredded tobacco from a supply header (4), and feeds it to at least one channel (17) for forming, on a conveyor (14), a bead (19) of tobacco, which is released onto a paper strip (22) travelling along a forming table (20) for forming a continuous cigarette rod (21); the method provides for cutting off supply of the first type (3a) of shredded tobacco to the header (4), emptying the header (4), cutting off communication between the header (4) and the input hopper (2), cutting off supply of the paper strip 15 (22), keeping the manufacturing machine (1) running to form a waste stream (30) of shredded tobacco of the first type (3a) and empty the manufacturing machine (1), and feeding a second type (3b) of shredded tobacco through the supply header (4) and the input hopper (2) to fill the manufacturing machine (1) completely before starting up supply of the paper strip (22).

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- *Z* document member of the same patent family
